

PHCSG Free Education Day

10th October 2019

At Billesley Manor Hotel, Billesley, Alcester, Stratford-on-Avon, Warwickshire B49 6NF

This day is designed for everyone working in primary care, whatever their knowledge. The landscape of Primary Care is changing with the arrival of Primary Care networks and Local Health Care Records and much more working at scale and the increasing reliance of digital solutions. The day is designed to look at what practices can do to make their records fit for sharing and to learn what that sharing will mean for them as well as the business processes to support this new environment.
